

Problem Solving Week 2

Foundation:

Fill the 3 function machines using the 9 calculations and expressions on the right to make each one true:

Higher:

There is a sale on at an electrical shop. One washing machine is priced at £467.80 after an 18% reduction. A second washing machine is priced at £469.80 after a 13% reduction. What was the original price difference between the two washing machines prior to the sale?
