

Quadratics Test – www.m4ths.com – Steve Blades

- (1) Solve $x^2 - 25 = 0$
- (2) Solve $x^2 - 3x = 0$
- (3) Solve $x^2 - x - 12 = 0$
- (4) Solve $x^2 = 6x + 7$
- (5) Solve the equation $3x^2 + 2x - 10 = 0$ giving your answers to 2 decimal places.
- (6) Solve $2x^2 - 200 = 0$
- (7) Solve $4 + 4x + x^2 = 0$
- (8) Solve the equation $(x - 3)(x + 4) = 0$
- (9) Solve the equation $5x^2 - 8x + 1 = 0$ giving your answers to 3 significant figured.
- (10) Solve $4x^2 + 10x = 0$
- (11) The diagram below shows a rectangle.

- (a) Set up and solve a quadratic equation to find x .
- (b) Hence find the perimeter of the of the rectangle.
- (12) Solve the quadratic equation $x^2 = 9x$ giving both solutions.
- (13) Find the solutions to $8x^2 = 2x + 5$ giving your answers to 3 significant figured.
- (14) Fred owns a large house and a small garden. He buys some wire to fence off his garden. **The fence has 3 sides as shown below.** One of the sides has length $(3x + 2)$ metres and 2 of the sides are x metres.

Given that the fenced garden has an area of $85m^2$, find the length of the wire Fred used.

- (15) The squares of two consecutive integers is 6161. Find the integers.
- (16) The height of a rocket is modelled as $h = 6t^2 - 3t$ where h is the height in metres above the ground and t is the time in seconds after its launch.
 - (a) Find the height of the rocket after 0.1 seconds.
 - (b) Find the time the rocket returns to the ground.
- (17) The sum of the squares of two consecutive odd numbers is 19210. Find the numbers.
- (18) The difference between the square of a number and the square of twice the number is 27. Find the number.
